

# RUTGERS

New Jersey Medical School

## NEUROLOGY GRAND ROUNDS

*This activity is provided by Rutgers New Jersey Medical School Department of Neurology and Neurosciences, and Center for Continuing and Outreach Education at Rutgers Biomedical and Health Sciences*

**Gilles de la Tourette's Syndrome: The Self under Siege**

**James Leckman, MD**

**MSB, B610**

**January 21, 2015**

**9:15am- 10:30am**

**Neison Harris Professor of Child Psychiatry, Psychology & Pediatrics**

**Child Study Center**

**Yale University School of Medicine,**

**New Haven, CT**

At the conclusion of activity, participants will be able to:

- Recognize key phenomenological and natural history features of tic disorders and related conditions – ADHD and OCD.
- Discuss recent research findings concerning our emerging knowledge concerning the genetics and environmental influences as well as the underlying neurobiology of Tourette syndrome.
- Explain the importance of psychoeducation for individuals with Tourette (as well as their parents, teachers and peers) and acceptance as well as the basics concerning the available (and future) cognitive-behavioral, pharmacological, and experimental immunomodulatory and electrophysiological interventions.

**Target Audience:** This learning activity is targeted to Neurologist, Neurosurgeons, Psychiatrist, Physicians, PAs, APNs, and Residents.
